Studying Ocean Color From Space: outreach and education in the junior classes

Natalia Suslina

Center for additional education of children "Small Academy of Sciences of the city of Sevastopol", Sevastopol, Russia, natalisuslina@mail.ru

Acknowledgments.

International Ocean Colour Science Meeting Busan, South Korea, 9-12 April 2019, Ocean Color From Space (https://oceancolor.gsfc.nasa.gov/outreach/)

Goals
- to develop a natural interest in modern scientific achievements in primary school children

Data
Ocean Color From Space (https://oceancolor.gsfc.nasa.gov/outreach/)
SeaWiFS Project, Studying Ocean Color From Space, Teacher's Guide with Activities https://oceancolor.gsfc.nasa.gov/SeaWiFS/LIVING_OCEAN/
Marine Hydrophysical Institute RAS (http://mhi-ras.ru/en/)
Institute of Marine Biological research RAS (http://imbr-ras.ru)

Conclusion:
- development of natural children's curiosity to the new, in particular, to the achievements of modern science in the popular accessible form;
- English as an important element of communication among the participants of the international scientific community.

I keep six honest serving-men...
I keep six honest serving-men
(They taught me all I knew).
Their names are What and Why and When
And How and Where and Who.
I send them over land and sea,
I send them east and west,
But after they have worked for me,
I give them all a rest.
I let them rest from nine till five,
For I am busy then,
As well as breakfast, lunch, and tea,
For they are hungry men.
But different folk have different views.
I know a person small-
She keeps ten million serving-men,
Who get no rest at all!
She sends'em abroad on her own affairs,
From the second she opens her eyes—
One million Hows, two million Wheres,
And seven million Whys!

Rudyard Kipling (1865-1936)
from «The Elephant's Child»
